Art Unit: 3634

1. Claims 1 and 2 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

These claims are replete with language for which its intended meaning is not understood and further contain numerous grammatical/idiomatic errors. For example: claim 1, line 2 "major/minor", line 3 "such as a", lines 7-8 "a preset spot thereon", line 10 "thus, in case the screen is drawn by great force in expansion", line 12 "precisely shelter the", lines 13-14 "the best using condition thereof"; claim 2, lines 2-3 "integrally molded into".

These claims are narrative in form and replete with functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cameron. Cameron discloses the claimed fixing device 14 including a hooked limiting piece 34,38 protruding therefrom.
